

Conwed Fibers® Cellulose Cellulose Fiber

The ideal choice in cellulose fiber!

- Conwed Fibers® Cellulose has an exclusive defibration process which allows for less fines, reducing a paper maché effect
- Provides a better interlocking ability for a breathable matrix, enhancing seed survival rates
- Easy to load, mix and shoot
- Can be used in any type of hydroseeding machines with no restrictions – contractors enjoy its flexibility in and out of the machine
- Provides better erosion control than straw and is close to the same cost
- Ideal for hydroseeding, tacking straw and hay mulch
- Non-toxic and environmentally safe
- Maximum slope length of 18 feet
- Use approved hydroseeding equipment for optimum pumping and application performance
- Conwed Fibers Cellulose functional longevity is ≤ 3 months

Product Composition:

Cellulose Fiber – 88% \pm 3%
Moisture Content – 12% \pm 3%

(40) 50-lb bales per pallet

Slope Gradient/Condition
 $\leq 4H:1V$

Rate
1500-2000 lb/acre*

*For maximum performance, 2000 lb/acre is recommended.
